ADDITIONAL COMMENTS, TAPING/ SPECIAL INSTRUCTIONS:

Warranty and Disclaimer

RIM TECHNOLOGIES (RT) warrants only item(s) coated by RT against significant flaking or rusting due to defects in workmanship by RT for a period of three (3) months from date of acceptance.

The warranty excludes damage to item(s) which occur during shipment, due to failures caused by products not supplied by RT and/or due to failures resulting in misuse, abuse, accident, neglect, mishandling, misapplication, alteration or modification of the item(s) which in turn, causes premature corrosion or coating failure.

The warranty does not cover item(s) that may rust or corrode due to the improper design, construction or fabrication of the item(s). Water traps or tight areas may not be able to be coated. These areas may lead to premature corrosion and are not the responsibility of RT.

All item(s) received by RT must be able to withstand temperatures of at least 400 degrees Fahrenheit. RT is not responsible for item(s) that may be damaged due to baking of these temperatures. RT is also not responsible for damage to these items removed per customer request.

RT is not responsible for damage of items(s) due to the pre-treatment process. Potential problems may be discussed prior to blasting. RT will not blast item(s) if the customer does not agree to assume the risks of item(s) warping, excess media getting trapped in areas of the item(s), holes forming in thin metal areas, or any other damage not described herein.

RT does not mask off any area or holes unless agreed to by customer. Any tapping, reaming, machining or sanding of item(s) after coating is the responsibility of the customer.

Cast aluminum and magnesium item(s) may experience an out-gassing and/or bubbling in the finished powder coat. We take every precaution to avoid out-gassing; however, we cannot be held responsible for bubbling caused by porous castings/substrates.

Any problems with the item(s) must first be reviewed by RT. RT reserves the right to determine what action, if any, will be taken to rectify the problem(s). This warranty does not cover repair of item(s) by any other service provider.

This warranty is limited to the "original" purchaser.

There are no express warranties except as specifically sent forth above. RT shall not be liable for incidental or consequential damages resulting from the use of the item(s), or arising out of any breach of this warranty.

Color variances due to changing material batches are not the responsibility of RT. The customer is responsible for reviewing and approving item(s) when they are picked up at RT or, if applicable, delivered to the Customer.

DISCLAIMER

We assume no responsibility for nicks, cuts, scratches or any other abusive wear and tear during customer's usage once item(s) have been powder coated. We are not responsible for burnt powder coating due to temperatures exceeding maximum powder coating limits once item(s) have been installed.

Rim Technologies does everything to get your item(s) prepped and coated in a timely manner. We use the FIFO (first in first out) method. Turnaround times can change daily and we do our best to represent an accurate time frame. We will call you when your job is complete. Please have the courtesy to hear from us first. Thank You!

There is a 50% additional charge for RUSH jobs.

PRICING

It is difficult to calculate exact pricing over the phone, therefore any verbal quote is an estimate. A firm written quote will be given when we see the item(s) and a color is chosen.

Prices generally include abrasive blasting, masking, surface preparation and powder coating.

Pricing does not include degreasing and cleaning, sanding or grinding pretreatment.

2-coat applications are higher priced. Clear coat is required for all metallics and silver coatings. Optional clear top coat or second coat is available.

All prices are for disassembled item(s). Item(s) that require disassembly will incur additional charges.

Masking of lettering or other objects as well as multicolor items will incur additional charges.
