## Uniforms: Cycling

### CS TECH

Only Champion System jerseys move and breathe with you using our exclusive microfiber CS Tech polyester wicking fabric. Our jerseys are designed for cool, warm, and hot/humid conditions. Champion System jerseys are anatomically shaped and tailored to a riding position.

### CS AIR LITE

Made from a premium Italian fabric the CS AirLite jersey offers superior breathing and moisture-management technology. Weighing in at an incredible 150 grams per yard, the CS AirLite jersey is so light you'll forget you're wearing it. Best of all, it offers an outstanding 50+ permanent UV Protection. For the ultimate in comfort and style choose the CS AirLite jersey and feel the difference.

### WIND GUARD

Champion System Wind Jackets and Wind Vests are made from our exclusive CS WindGuard fabric. CS WindGuard is a lightweight shell fabric that is both wind and water resistant. Perfect for cool weather conditions, garments made with CS WindGuard can be easily removed and stored in a jersey pocket.

### THERMO SHIELD

Forget layers and layers of rough, bulky and ill-fitting clothing. Champion System's CS ThermoShield fabric is designed to keep you warm even when temperatures drop below freezing. Our exclusive CS ThermoShield fabric is a windproof, three-layer fleece. With normal fabrics, wind cuts through the material, making you feel cold. CS ThermoShield stops the wind and the chill that comes with it.

**CS Vivid** - High visibility optional extra for pockets of jersey or rear panel of knicks. Hundreds of reflective dots on each piece. \$25/piece

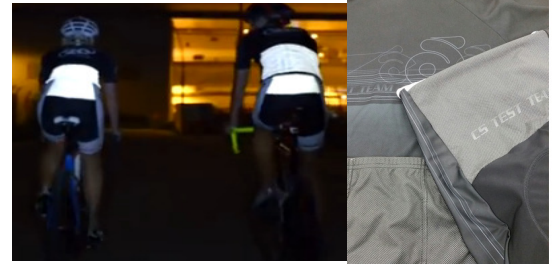

### Reflective Piping

**Extra Length** - Knicks and tri tops can come with an additional 1.5 inches length at no cost.

All items available women's specific (except marathon singlet).

All jerseys available with 7", 3/4 or full length zips.

Most items come in an elite cut or fabric not listed here. If you are interested in these, please contact Ruth Henwood for further information [ruhenwood@gmail.com](mailto:ruhenwood@gmail.com)
