Earth Compound

BioDynamic Compost

Powder

Sizes:	1 pound	SKU:	00E-7005-C01	Orders:	www.vironotics.com
	2 pound		00E-7006-C02		304-940-8218
	5 pound		00E-7007-C05		
	30 pound		00E-7008-C30		

Compounding the elements of life, with the wisdom of heritage and modern technology, blended by hand, into a Master Formulation, Potentized and Incubated in the Earth for up to a year to produce a Rich Dark High Quality BioDynamic Compost. **The Food Your Soil Needs!**

Earth Compound is extremely concentrated. A single tablespoon is enough for a 5 gallon bucket applied to a full acre of land. This product is developed on a Certified Organic and BioDynamic farm, owned and worked by the same family for over 350 years! Our microbes have grown up together and remain very close friends.

Earth Compound is a compost tea inoculant that works great in any compost tea recipe or any custom or commercial brewing system. It can be used by itself in hydroponics or soil, to inoculate compost, added to a grow mix or as a field spray.

Earth Compound is a premium biodynamic **Compost** made from Certified BioDynamic ingredients prepared on Certified Organic soil, including cow manure, ground eggs and oyster shell, basalt, paramagnetic rock dust, local seaweed, worm castings, crushed biochar, cotta, and BioDynamic preparations. Once the material is thoroughly dynamized it is placed in an in-ground fermentation pit and the biodynamic compost preparations are added; preparations bd500 and bd 501, horn manure and horn silica, respectively. Covered with a clay cap, it sits for 6 months to a year until fermentation is complete and it becomes a rich, dark high quality humus rich in beneficial fungi, protozoa, bacteria and nematodes, vibrating with Earthly and Cosmic energy.

This gives the ability to use the preparation as a silica spray when potentized in the morning for application before noon where it will act in a way to promote flowering, fruit and seed production; or as manure spray if used in the afternoon to deepen and promote root growth, balancing the roots with stem, leaf, flower and fruit/seed.

Compost Tea: Mix one cup **Earth Compound** per 100 gallons of water. In a 500 gallon brewer, use three cups. Add a food source such as seaweed or fish emulsion and other botanical teas such as equisetum and nettle tea. Inoculant goes into the water loose, filter out particles too large to flow through the spray nozzle before spraying. For smaller systems, use one teaspoon in 2 to 5 gallons, 1/8 cup in 10 gallons.

Field / Garden Spray: Mix 1/3 cup **Earth Compound** per acre in three to five gallons clean water in a suitable bucket and stir. To potentize manually, (optional) find a comfortable stick, stirring from the periphery create a vortex first clockwise, then counter clockwise. Repeat for twenty minutes up to an hour. May be performed with larger amounts in larger vessels.

Apply with backpack or tractor mounted sprayer not exceeding 40 pounds of pressure. More pressure will destroy the microbes.

Propagation: Sprinkle **Earth Compound** onto plugs or starts or mix with water and sprinkle.

Compost Inoculant: Mix 2 Tbsp **Earth Compound** to 5 gallons clean water and soak the compost pile. For best results repeat monthly.

PreMix: Blend at least 1 cup **Earth Compound** into 2 cu ft by volume. Mix evenly into growing medium.

Soil / Hydroponics: Mix 1/2 ounce **Earth Compound** into 5 gallons solution and stir. Potentize (optional) according to Field Spray directions. Apply as soil/media drench weekly or as needed.

Be aware mixture may contain small insoluble particles that may clog sprayer screen.

Apply additional fertilization as needed. Product does not supply all essential plant nutrients.

Derived from farm and vegetable compost.

Vortex Brewer: Is the original, most effective compost tea brewer available. Not only does the **Vortex Brewer®** create living, organic compost tea, but it acts as an extractor, it will potentize fertilizer recipes, allow for perpetual brewing, and can stir BioEnergetic concoctions for anything from stimulating soil regeneration to concentrating best or disease control applications.

For more info contact us at info@environotics.com

The **Vortex Brewer®** is unlike any compost tea brewing system on the market. It has limitless uses, from growing microbes to generating living, energized water.

Not only does the **Vortex Brewer®** create living, organic compost tea, but it acts as an extractor, it will potentize fertilizer recipes, allow for perpetual brewing, and can stir BioEnergetic concoctions for anything from stimulating soil regeneration to concentrating pest or disease control applications. All of this is done through respect for the abilities of water. Water is a magical substance that when used merely to dissolve substances as a delivery system loses its greatest ability to hydrate cells and facilitate the communication of subtle energies.

With the **Vortex Brewer®**, "We don't make a vortex, we allow it!"
